

## Outcome Identifier - Training Organisation

Field is collected as part of the State data collection.

### Definition

*Outcome Identifier - Training Organisation* is the code or grade used in the CMIS, RAPT or local systems to indicate a training provider's local academic or administrative result for a subject enrolment. It classifies the result achieved by a client enrolled in a subject enrolment in terms of the grade set stated on academic transcripts issued by a college/provider.

### Context

*Outcome Identifier - Training Organisation* provides a complete and appropriate set to result codes to enable training organisation to manage enrolments on an on-going basis. By facilitating the mapping of *Outcome Identifier - Training Organisation* to *Outcome Identifier - National* they also insulate training providers from past and future nationally driven changes to the AVETMISS *Outcome Identifier - National* field.

### Classification Scheme - State Training Providers

- (c) For interim reporting, 'blank' or 'H' are to be mapped to *Outcome Identifier - National '71'* for enrolments ending in this collection year.
- (d) Note that *Outcome Identifier - National '52'* will be derived from CMIS result code 'UR' or 'R' and Delivery Type 'R'; and *Outcome Identifier - National '54'* will be derived from CMIS result code 'UR' or 'R' and Delivery Type 'C'.
- (e) On CMIS, 'NY' is mapped to *Outcome Identifier - National '70'* or '71' for colleges' internal use only.
- (f) 'WT' is used where a client withdrew from a class to transfer to another class. Enrolment in the first class is not reported ('NR').

## Classification Scheme - Non-STP Contracted Providers

Contractual instructions to those non-STP providers that win tenders let by the Department to conduct accredited vocational education and training will require the use of the following grade set. Any exceptions will be negotiated during award of the tender and noted in the contract:

- (b) For interim reporting, '5' is to be mapped to *Outcome Identifier - National '71'* for enrolments ending in this collection year.

## Rules

The code-sets, rules and mappings for *Outcome Identifier - Training Organisation* must be read in conjunction with the code-sets and rules for the *Outcome Identifier - National*.

The provider must classify each subject enrolment according to the outcome granted to the client.

Result code '2', 'H', or 'R' must not be used for subject enrolments where the student has withdrawn, formally or otherwise. Result codes '2' and 'R' can only be used where the student

has participated until the end of the enrolment and/or has been assessed against all assessment criteria.

Clients withdrawing from a class to transfer to another class must be reported under the later subject enrolment only.

This field may be blank only where the student has engaged in the learning activity and study in the subject enrolment is still in progress. Non-STP contracted providers are to use code '5' in this instance.

A subject enrolment will not be accepted in the collection where the *Outcome Identifier - Training Organisation* is blank, 'H' or '5' and the *Activity End Date* is in the collection year and has passed by more than 7 weeks.

The *Outcome Identifier - Training Organisation* must be a valid value as specified in the grade set above.

In the state AVETMISS report, the Department must ensure that there is an unambiguous mapping of *Outcome Identifier - Training Organisation* to *Outcome Identifier - National* for all reported subject enrolments.
