Marine and Maritime Studies | General Year 12 | Summary of minor syllabus changes for 2025

The content identified by ~~strike through~~ has been deleted from the syllabus and the content identified in *italics* has been revised in the syllabus for teaching from 2025.

Unit 3

Science as a Human Endeavour (page 10)

- Southeast Asia has a long history of aquaculture, but rapid expansion did not start until after the mid-1970s, with ~~output of food fish exceeding five million tonnes in 2005,~~ and the region producing a significant proportion of the world aquaculture output *of food fish* in terms of volume and value. Modern, ~~extensive~~ aquaculture technologies have been employed *to raise a and a rapidly growing volume and range of species, through a variety of methods,* ~~have been raised in tanks and ponds on land, or in cages and nets in oceans, lakes and rivers, helping to meet the growing demand for this food source protein~~
