

Materials Design and Technology (Textiles)

General Course

Year 12

Selected Unit 3 syllabus content for the Externally set task 2024

This document is an extract from the *Materials Design and Technology General Course Year 12 syllabus*, featuring all of the content for Unit 3. The content that has been highlighted in the document is the content on which the Externally set task (EST) for 2024 will be based.

All students enrolled in the course are required to complete an EST. The EST is an assessment task which is set by the Authority and distributed to schools for administering to students. The EST will be administered in schools during Term 2, 2024 under standard test conditions. The EST will take 50 minutes.

The EST will be marked by teachers in each school using a marking key provided by the Authority. The EST is included in the assessment table in the syllabus as a separate assessment type with a weighting of 15% for the pair of units.

Unit 3

Common content

Design

Design fundamentals and skills

- investigate
 - designs in practice
 - needs, values and beliefs of the designer/developer
 - sources of design inspiration
 - performance criteria for products
 - application of design fundamentals and factors affecting design
 - aesthetics
 - function
 - cost
 - measurements
 - environmental impact and considerations
 - safety
- devise
 - using communication and documentation techniques
 - sketching and drawing
 - rendering
 - annotating
 - understanding the elements and principles of design where applicable in context
 - line
 - shape
 - form
 - texture
 - contrast
 - proportion
 - balance
 - colour
 - rapid concept development techniques to generate design ideas and concepts
 - final design concept using design brief and performance criteria
 - review of best idea using design brief and performance criteria
 - design solution
 - develop best concept using annotated hand or computer generated graphics (front, back views and detailed sketches as necessary)
 - 2D illustrations (working/technical drawings)
 - 3D illustration (presentation drawings)
 - inspiration/concept/storyboard
 - production plans
 - materials list
 - costing for all materials components
 - stages of production
- evaluate
 - final product against design brief, initial design and performance criteria related to needs, values and beliefs of the end user

Use of technology

Skills and techniques

- ICT, portfolio development and communication skills
 - photography – final product
 - documenting presentations and evaluations
- context appropriate drawing and relevant technical information to produce the final product to demonstrate:
 - sketching rapid concept developments
 - 3D presentation drawings
 - rendering techniques
 - 2D working drawings or using templates
 - inspiration/concept or storyboard development and presentation
- select appropriate materials and calculate the quantities of materials required to complete the project
- with supervision, operate machinery and tools appropriate to context

Safety

- correct use of personal protective equipment (PPE) where applicable
- occupational safety and health (OSH) practices appropriate to tasks being undertaken in workshops
- apply risk management strategies in the workshop/studio
- assess the condition of tools and machinery

Production management

- production planning
 - using tools, equipment and machinery to complete production
 - follow instructions from plans
 - maintain safety requirements
 - record changes to materials lists or costing
- ongoing evaluation techniques: progress/decision changes made to the project

Textiles context content

Materials

Nature and properties of materials

- fibre types and classification
 - natural fibres
 - cellulosic – cotton, linen
 - protein – wool, silk
 - manufactured fibres
 - regenerated – rayon, acetate
 - synthetic – polyester, nylon
- investigation of natural fibres – cotton, wool
 - fabric names
 - care
 - properties
- fabric structures
 - woven – warp, weft, selvedge
 - knitted – course, wale
 - non-woven – felt, web
- aesthetic properties
 - lustre
 - drape
 - handle
- physical properties
 - durability
 - strength
 - abrasion resistance
 - resilience
 - elasticity
 - dimensional stability
 - shrink resistance
- chemical properties
 - absorbency
 - thermal properties
 - flammability
 - sun resistance
 - colourfastness

Materials in context

- specific textiles and their uses
 - apparel
 - furnishings
 - costumes
 - textile arts
 - non-apparel items
- environmental impact of the textile industry
 - growing, extraction and processing – cotton and wool
 - end-of-life of a product – recycling and safe disposal

Use of technology

Skills and techniques

- ICT skills related to design development and presentation
- demonstrate drawing skills
 - sketching – rapid concept development
 - 3D presentation drawings – using templates
 - 2D working drawings – using templates
 - inspiration/concept and storyboard
- apply pattern skills
 - use a commercial pattern
 - take basic body measurements
 - design and wearing ease
 - select pattern using body measurements
 - pattern parts
 - pattern layout
 - cutting out
 - transfer pattern markings
 - pattern adaptations as required
- demonstrate how to correctly operate and adjust:
 - sewing machine
 - overlocker
- demonstrate machine skills
 - threading
 - straight stitch
 - zig zag
 - changing machine feet
 - changing machine needle
 - use overlocker for neatening
- select and apply appropriate construction and pressing techniques
 - joining
 - shaping
 - closures
 - finishing
- select and apply fabric decoration, embellishment and manipulation techniques as required
